

# WATER BY NUMBER

---

A voluntary, but important water use plan for Broken  
Arrow

Broken Arrow water usage nearly doubles during the summer months because of outdoor usage. This places a heavy load on our water system.

In 2021, Broken Arrow homes and businesses used over 4.5 Billion Gallons of water. By using water wisely, we can lower our water bills, reduce water quality events caused by surges in water use, and help postpone expensive water system upgrades.

Tips

# FOR SAVING WATER OUTDOORS

# TIP

Water before 7 am or after 7 pm to reduce evaporation that occurs during the hottest parts of the day.

# TIP

Optimize the settings on your sprinkler system to avoid overwatering or watering sidewalks and streets.

# TIP

A rain/freeze sensor saves water by not operating while it is raining or during freezing temperatures.

# TIP

Drip irrigation and soaker hoses also save water and encourage deep root systems on your plants.

# TIP

By watering on odd and even days, we can reduce our usage by several million gallons each day. This reduction is important on days when our water treatment plant is producing yearly maximum amounts of water.

# WATER BY NUMBER

**Odd house numbers**  
water on **odd** days: 1st,  
3rd, 5th, 7th, 9th, 11th...

**Even house numbers**  
water on **even** days:  
2nd, 4th, 6th, 8th...

# WATER BY NUMBER

When it is not your day to water, you should avoid filling hot tubs and swimming pools. You should also avoid using hose-end sprinkler systems or automatic irrigation systems.
